

Create a visual concept map for the DBMS software architecture, illustrating the flow from user request to data retrieval.

Construct a concept map linking the following terms: DBMS, Schema, Instance, Data Model, ER Diagram, Entity, Attribute, Relationship

Design a concept map for ER diagram components: entity, weak entity, attribute types, relationship types, and participation constraints.

Types of Attributes

Map the relationship between file-based systems and database systems, highlighting the problems solved by DBMS.

Designa concept map for the roles and responsibilities in a DBMS Environment:DBA, End User, Application Developer.
